A money-weighted approach can be used as a measure of the rate of return for an asset (or portfolio of assets) where the schedule of cash flows is not necessarily periodic, i.e. where transactions can occur irregularly.

Shadow Policy Account: A Shadow Policy Account shall be maintained on a daily basis and shall be computed based on the actual accruals of all income elements for the Corporation like contributions, income from investments as and when received and all actual debits i.e. partial withdrawals to the policy account value as and when debited, to arrive at the actual gross investment return and reduction in yield to the policy account value, at the end of each year starting from policy year 5.
